CIA No. 1226
26 November 1969

MEMORANDUM FOR: Arms Control and Disarmament Agency
ATTENTION : Lt. Col. Garland, WEC/FO
SUBJECT : Draft Test Plan FT-51

1. We have reviewed the draft plan for Field Test 51 and are in general agreement with its concept, objectives and procedures. So that this Agency can work as closely as possible with the detailed planning, we are prepared to provide a member of the Intelligence Steering Committee.

2. For those activities which fall in the COMIREX area, it is urged that ACDA develop a suitably classified annex detailing the support to be expected as well as appropriate procedures for such support. For example, secure communication arrangements between Washington and the field will probably be necessary.

3. Since there is no precedent for a Verification Center such as described in this plan, we are unable fully to evaluate its personnel requirements. On the surface they would appear to be adequate for test purposes. At this point in time, however, this Agency is not in a position to commit any imagery interpretation resources to this task.
